118 [10:01:52] <erratic> I think if we all worked together we could turn a substantial number of the internet's rogue bots into our  
own outlet that would finance our projects

119 [10:02:36] <erratic> I do it all the time

120 [10:02:42] <erratic> just think of what we could do collectively

121 [10:03:34] <erratic> as long as we dont get much bigger of a group than we are now

122 [10:04:25] <erratic> I'm pretty careless but I'm careless because nobody gives a fuck

123 [10:04:33] <erratic> but I could stand to be less careless

124 [10:05:09] <erratic> seriously like

125 [10:05:13] <erratic> the shit I've done

126 [10:05:27] <erratic> way worse than what adrian lamo got arrested for initially

128 [10:05:53] <erratic> RIP adrian

2 [11:40:47] <erratic> you'll have to apt-get install tor and proxychains ...

3 [11:40:50] <erratic> and aws-cli

4 [11:41:12] <erratic> then you can verify it with 'aws sts get-caller-identity'

5 [11:41:30] <erratic> but you'll wanna do something like

6 [11:41:40] <erratic> alias aws="proxychains4 aws"

7 [11:41:48] <erratic> so that it gets torified

8 [11:42:03] <nance> Neat!

9 [11:42:28] <erratic> <https://termbin.com/3qn7> proxychains.conf if you need it

10 [11:43:13] <erratic> yeah aws is great, except when someone steals your IAM instance profile that has full access to the account :)

11 [11:43:58] <erratic> you may have to edit torrc to get it to work right

12 [11:44:00] <erratic> sec

13 [11:44:53] <erratic> yeah I dont have anything special in mine so i think all you gotta do is apt-get install tor && systemctl enable tor && systemctl start tor

14 [11:46:17] <erratic> if you wanted to scrape somebodys s3 buckets you can do ...

15

16 [11:47:10] <erratic> run that in a directory like scrapes and also change the name phillips to whatever you want, I usually use the company name that owns the account...

17 [11:47:32] <erratic> lolz

18 [11:47:48] <erratic> yeah you'll need jq (apt-get install jq) for that

19 [11:47:59] <erratic> also gnu parallel (apt-get install parallel)

20 [11:48:57] <erratic> I would actually not rely on alias aws="proxychains4 aws" for that and rather change the two usages of aws in that 1 liner to proxychains4 aws explicitly because the environment forks and it doesn't copy the parent unless you have set -a or something

21 [11:50:33] <erratic> that will straight up mirror all of an accounts s3 buckets though which you'll wanna make sure you have the disk space for

22 [11:51:25] <nance> Interesting. I'll have to read thru this more when I get to a proper terminal

23 [11:51:30] <nance> Phone irc sucks

24 [11:51:32] <erratic> but yeah if you just wanna use it to learn how to do some shit with aws go for it its not my shit lol

25 [11:51:38] <erratic> no worries :)

26 [11:52:07] <nance> I just legit need to learn AWS and s3 for work lol

27 [11:52:30] <nance> Make the jr dev ops dudes feel threatened

28 [11:53:48] <erratic> definitely yeah go for it if you wanna use that account for practice, should be fine if you use tor even without I've fucked with a lot of aws accounts from my own address because most people don't have a fucking clue how to use logging
